

BREEDING RAMS

Meadow Quality operates a Ram Marketing Scheme. This uses visual appraisal combined with Estimated Breeding Values to assess the performance of the rams and how they can improve the growth, muscle and leanness of your lambs.

A ram can be selected that is suited to your ewes and management system. The scheme gives producers access to pedigree rams of all breeds and they are available throughout the country.

When ordering Rams from Meadow Quality, producers can choose either lambs or shearlings, so the varying needs of different production systems are met. Producers can view the rams themselves or have them selected by Meadow Quality's field staff.
