

## FINISHED SALES

Meadow Quality provides an independent source of advice, with a wealth of knowledge and is ideally placed to market producers' pigs to maximize their returns. At Meadow Quality we believe in having a range of options, so that our service can be tailored to individual circumstances. We know that every producer, his pigs and his farm system are different and our marketing reflects this. On average, we market around 8,000 pigs a week. This includes pigs from pork to bacon weight, on a weekly or contractual basis.

Meadow Quality works closely with a number of pig processors throughout the country. We aim to find the right combination of weight range, grading profile and premium to consistently match their requirements. The relationships that we have developed over thirty five years of pig marketing enable us to deliver real and tangible benefits to our finished pig producers.
