

HEREFORD AND ANGUS PREMIUM SCHEME

Meadow Quality organises various producer groups of over 100 farmers who supply Hereford and Angus cattle to specific outlets for a premium. Large numbers of finished cattle are sent each week, to match a defined quality standard.

There are some opportunities to become part of this dedicated supply chain, by registering as a committed store cattle or calf producer. Angus and Hereford stock, with named registered sires, especially steers, are always in demand. By becoming part of one of these producer groups you can ensure that your stock are grown so that they meet the quality needs of the end processor, and will therefore make a greater return when sold to a finisher.

To find out more about becoming involved, call your local fieldsperson.
