

LAMB SELECTION

Outlets

Meadow Quality deals with a large number of abattoirs and processors across the UK, marketing over 1,000 lambs a week. This means the most suitable outlet for all types of stock can be identified and the revenue that producers receive maximised.

We have orders for all types of lambs; butcher, supermarket, catering and export. In total, Meadow Quality has a dozen different outlets for finished lambs.

Meadow Quality's Livestock Marketing Specialists can visit on farm and give independent advice on feeding and management so lambs achieve their potential. When assessing the best outlet for your lambs, the prices, grid payments, weight ranges, dressing specification, abattoir charges and any bonuses are all considered.

Grading

When marketing lambs through Meadow Quality, producers receive full grading results, allowing analysis of the animals' performance. This is emailed, usually within 24 hours of slaughter. Our Livestock Marketing Specialists can assist in this process and help sheep units improve returns.

Transport & Payment

Meadow Quality can arrange haulage for producers. A number of reputable companies are used and are all ABM approved. By working for a group of producers, Meadow Quality can combine loads and plan journeys effectively, reducing transport costs.
