OR

The holding is under movement restriction for bovine Tuberculosis (TB)\*  
 \*delete one

The cattle on the holding are not under movement restrictions for any other reason (excluding a 6-day standstill).

The animals consigned show no abnormalities, are fit to travel and show an acceptable level of cleanliness and have been observed for all veterinary medicines and other treatments including any medicated feed administered to the animals within the last 28 days.

To the best of my knowledge the animals are not showing signs of any disease or condition that may affect the safety of the meat derived from them.

No analysis of samples taken from animals on the holding or other samples has shown that the animals in this consignment may have been exposed to any disease or condition that may affect the safety of meat or to substances likely to result in residues in meat.
